Library of Congress Cataloging-in-Publication Data

Names: ASHRAE (Firm), author.

Title: Thermal guidelines for data processing environments.

Description: Fifth edition. | Peachtree Corners, GA : ASHRAE : Peachtree Corners, [2021] | Series: ASHRAE datacom series ; book 1 | Includes bibliographical references. | Summary: "Covers equipment operating environment guidelines for air-cooled equipment, environmental guidelines for liquid-cooled equipment, facility temperature and humidity measurement, equipment placement and airflow patterns, equipment manufacturers' heat load and airflow requirements reporting, and methods for increasing energy efficiency and avoiding electrostatic discharge"-- Provided by publisher.

Identifiers: LCCN 2020046021 | ISBN 9781947192645 (paperback) | ISBN 9781947192652 (adobe pdf)

Subjects: LCSH: Data processing service centers--Cooling. | Data processing service centers--Heating and ventilation. | Buildings--Environmental engineering. | Data processing service centers--Design and construction. | Electronic data processing departments--Equipment and supplies--Protection. | Electronic apparatus and appliances--Cooling.

Classification: LCC TH7688.C64 T488 2021 | DDC 697.9/316--dc23

Acknowledgments

ASHRAE Technical Committee (TC) 9.9 would like to thank the following members of the IT subcommittee for their groundbreaking work and willingness to share in order to further the understanding of the entire data center industry and for their active participation, including conference calls, writing/editing, and reviews: Dustin Demetriou (IBM), Dave Moss (Dell), Mark Steinke (AMD), Roger Schmidt (IBM, retired), and Robin Steinbrecher (Intel, retired). Thanks also to Roger Schmidt for leading the effort on updating this fifth edition.

A special thanks is due to Syracuse University Mechanical and Aerospace Engineering Department and the leadership of Professor Jianshun Zhang and his team, including PhD student Rui Zhang, for carrying out the research to investigate the effect of high humidity and gaseous pollutants on information technology equipment (ITE). The result of this work was the primary reason for this fifth edition.

ASHRAE TC 9.9 also wishes to thank the following people for their constructive comments on the draft of this edition: Jason Matteson (Isotope), Jon Fitch (Midas Green Technologies), John Gross (J. M. Gross Engineering, LLC), Dave Kelley (Vertiv, retired), Ecton English, Gerardo Alfonso (Ingeal), and Vali Sorell (Microsoft).

Finally, special thanks to Neil Chauhan of DLB Associates for creating a consistent set of graphics for this updated edition.
