# SMART RACK ALL IN ONE

Modern Rack Server with Automatic Monitoring & Control Technology

*Temperature &  
Humidity Sensor*

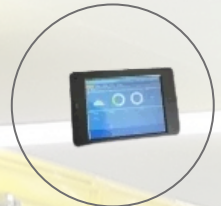

*Smoke Sensor*

*Smart Door Lock*

*Air Conditioning*

*LCD Display*

*Water Leakage Sensor*

*Surveillance System*

*UPS System  
(Uninterruptible  
Power Supply)*

## Product Specification

|                    |                        |                             |
|--------------------|------------------------|-----------------------------|
| Size               | 42Ux800x1200 in mm     |                             |
| Weight             | 350kg                  |                             |
| Air Cooling System | Size                   | 8U (442*714*351) in mm      |
|                    | Cooling Capacity       | 7.5kW                       |
|                    | Heating Capacity       | 2kW                         |
|                    | Airflow                | 1600m3/h                    |
|                    | Type Model             | Direct Expansion Air Cooled |
| UPS System         | Size                   | 2U (432*635*85) in mm       |
|                    | Efficiency             | Up to 95%                   |
|                    | UPS Capacity           | 3kVA                        |
|                    | Display                | LCD Display                 |
| Environment System | Display                | LCD Display Touchscreen     |
|                    | Smoke Alarm            | Included                    |
|                    | Temperature & Humidity | Included                    |
|                    | Water Leakage          | Included                    |
|                    | Available Space        | 26U                         |
